

Say and Switch - Speaker / Listener Cards

One partner explains while the other listens; switch roles only when the signal is given.

SPEAKER

Explain your thinking clearly. Give a reason, example, evidence, or step. Watch for signs your partner needs clarification.

LISTENER

Listen for meaning. Do not take over the explanation. Be ready to paraphrase, ask one clarifying question, or add after the switch.

SWITCH

Change roles. The new speaker continues, responds, or explains another part. The new listener focuses on understanding first.

SYNTHESIZE

At the end, identify what both partners now understand, where they differ, or what question remains.
